## CAREER OBJECTIVE:

A motivated and detail-oriented data analyst with a strong foundation in statistics, data manipulation, and visualization. Seeking to leverage technical and analytical skills to solve complex problems and drive business insights in an entry-level data analyst role.

## WORK HISTORY:

### Data Analyst Intern, Unified Mentor Pvt Ltd

Jan 2024-April 2024

- Acquired practical experience in data cleaning, data visualization, and dashboarding.
- Performed data cleaning tasks including handling missing data, duplicates, outlier detection, data scaling, transformation, and encoding categorical variables.
- Created data visualizations using Python libraries (matplotlib, seaborn) and Power BI.
- Developed proficiency in Python for data analysis, leveraged Power BI for insightful data visualizations, and used Excel for complex data manipulation and financial modeling.

## EDUCATION:

### M.Sc. Information Technology, Kishinchand Chellaram College

2022 - 2024 (Pursuing)

### B.Sc. Information Technology, Lala Lajpat Rai College of Commerce and Economics

2019 – 2022(CGPI: 9.19)

## TECHNICAL SKILLS:

**Programming Language:** Python, JavaScript, SQL

**Data Manipulation:** pandas, NumPy

**Data Visualization:** matplotlib, seaborn, Power BI

**Database:** MySQL

**Frameworks:** Flask, Dash, ReactJS Basics.

**Web Development:** HTML, CSS, Bootstrap, Tailwind.

**Tools:** Excel, Jupyter Notebook, Google Collab, Microsoft Word, PowerPoint, GitHub.

**Designing:** Figma, Canva, Wireframing, Prototyping.

**Other Skills:** Data Cleaning, Data Wrangling, Data Visualization, Exploratory Data Analysis (EDA), Statistical Analysis, Machine Learning Basics.

**Soft Skills:** Problem-Solving, Communication, Collaborative Team Player, Attention to Details.

## PROJECTS:

### Exploratory Data Analysis (EDA) on Diwali Sales:

- Conducted EDA on Diwali sales data using Python, Pandas, NumPy, Matplotlib, and Seaborn.
- Identified trends and patterns in Diwali sales data through statistical methods and data visualization.
- Tools:** Python, Pandas, NumPy, Matplotlib, Seaborn.

### Amazon Sales Data Analysis:

- Analyzed Amazon sales data to identify key trends and business improvement areas.
- Created visualizations with matplotlib and seaborn to support data-driven decisions.
- Tools:** Python, pandas, matplotlib, seaborn.

### Power BI Project (Financial Reports):

- Designed a Power BI Financial dashboard to understand goods sales.
- Created an effective dashboard to display sales trends for informed decision-making.

## CERTIFICATES:

- Power BI (Simplilearn) | [Certificate](#)
- SQL For Data Science (Great Learning) | [Certificate](#)
